DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Latimer (3,244,795).

Latimer discloses a laminated electrical flat conductors wherein the widths of the conductor tracks (15, 16, 17) are staggered in an arithmetic sequence and that the spacings between adjacent conductor tracks are preferably of the same size or also staggered in an arithmetic sequence.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2, as best understood, is rejected under 35 U.S.C. 103(a) as being unpatentable over Latimer.

Latimer discloses the invention as claimed in claim 1 but does not disclose connectors connecting to the conductor tracks. Although not disclosed by Latimer, it would have been obvious to one skilled in the art to use electrical connectors to make electrical contact with the conductor tracks of Latimer since using connectors with electrical flat conductors is known in the art.

Allowable Subject Matter

5. Claim 3 is allowed.

Response to Arguments

6. Applicant's arguments filed July 3rd 2003 have been fully considered but they are not persuasive. Applicant argues that Latimer fails to disclose a flat flexible cable in which the widths of conductor tracks are staggered in an arithmetic sequence because the conductor tracks of Latimer always have the same width. This argument is not found persuasive. Even though the conductor tracks (15,16,17) of Latimer always have the widths, the widths of the conductor tracks are staggered in an arithmetic sequence. In other words, the conductors 15, 16 and

17 are staggered with respect to their widths, or the conductors 15, 16 and 17 are not aligned one to another. What shown and disclosed in the present invention is that the conductor width in each conductor track is different, and the conductor tracks are staggered according to their widths.

Summary

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
